- \*Available in 4 color, 6 color, + white or spot varnish
- \*High Resolution printheads, 14 or 42 pl drop size
- \*Dual UV Curing lamps with shutters
- \*Oversized printing table allows printing of larger pieces of board, wood or any other solid substrate.
- \*Adjustable height of printhead carriage
- \*Will take any media up to 1.8 meters wide.
- \*Easy swapover between flat table and roll to roll option.

### FujiFilm Sericol Acuity Advance

- \*Capable of printing both roll to roll and rigid material
- \*Available in 4 color, 6 color, + white or spot varnish
- \*High Resolution printheads, from 6 to 42 pl drop size
- \*Dual UV Curing lamps with shutters
- \*Zoned vacuum table
- \*Production speeds of approx. 22 sqm / hr
- \*Capable of full bleed printing
- \*White color optional.

Time is of the essence. Labor is not cheap. Printing 50 boards on self adhesive vinyl and pasting them on foamboard is a time consuming, and expensive task.

### Enter UV Flatbed Printing.

DigiGraphics has once again come to market with two products that are designed to maximize your bottom line. The new range of **Acuity** flatbed printers by FujiFilm Sericol is designed to deliver high quality unattended printing with minimal user intervention. The more industrial **GCC** range of flatbeds builds upon years of experience in the printing and cutting industry. Both machines use the same high quality heads delivering sharp text in a size as small as 4 pt, and even in white ink! Couple that with a 3 year outdoor written warranty against ink fading, and the ability to print on almost any type of substrate and you end up with one simple conclusion - more money in the bank. **It's time to take the competition out.**
